Essential services delivered with confidence

WAZOLETU SOLUTIONS LIMITED is a legally registered Ugandan company providing professional cleaning services, future-ready ICT solutions and general supplies to corporate organizations, NGOs, institutions, and commercial establishments. We are committed to delivering reliable, hygienic, cost-effective, and environmentally responsible solutions tailored to meet the diverse needs of our clients.

Mission

To provide high-quality cleaning, future-ready ICT services and supply solutions through trained personnel, modern equipment, and customer-centered service delivery.

Vision

To be a trusted Ugandan corporate services partner recognized for consistent delivery, practical innovation and long-term client value.

Core values

Integrity We communicate honestly, act responsibly and honour our commitments.	**Quality** We apply clear standards and verify delivery before considering work complete.	**Reliability** We plan carefully, respond promptly and keep client operations moving.
Customer focus We shape solutions around each client's priorities, constraints and service expectations.	**Innovation** We use appropriate technology, better methods and continuous improvement to create practical value.	**Accountability** We take ownership of outcomes and remain engaged until issues are resolved.

Three capabilities one service standard

Our integrated model gives clients a single point of accountability across procurement, digital operations and workplace hygiene.

01 General Supplies	Coordinated sourcing, quality verification, consolidation and delivery for routine and specialised business requirements.
02 ICT Solutions	Infrastructure, cybersecurity, software, cloud, hardware and managed support designed around continuity and growth.
03 Professional Cleaning	Site-specific cleaning and hygiene programmes delivered by trained teams using documented quality controls.

Benefits of an integrated partner

- One accountable relationship across multiple operational needs
- Consistent service standards, communication and reporting
- Reduced vendor coordination and procurement complexity
- Solutions that can scale from individual requests to managed-service partnerships
- Local market understanding supported by disciplined delivery processes

Our service promise

Every assignment is guided by agreed specifications, transparent communication, dependable timelines and a practical focus on the client's operational outcome.

General Supplies

A coordinated procurement service that helps clients obtain the right products, at the required quality, within the agreed timeframe and budget.

Our team manages the procurement cycle from requirement clarification and supplier assessment through consolidation, quality verification and delivery. This gives clients a dependable route for routine, bulk, recurring and specialized requirements.

Supply categories

Office and corporate stationery

Paper products, filing materials, writing instruments, desk accessories, printing consumables and everyday office essentials.

Industrial equipment and materials

Operational equipment, tools and selected raw materials sourced to documented specifications.

Safety gear and protective equipment

Personal protective equipment and workplace safety items suited to the client's operational environment.

Corporate branding materials

Customized promotional items, branded merchandise and selected visibility materials for organizations and events.

Cleaning products and equipment

Detergents, consumables, dispensers, tools and cleaning equipment for workplace and institutional use.

Institutional and facility supplies

Practical supply packages for offices, healthcare facilities, public institutions and project sites.

How clients benefit

- Vetted sourcing against specification, availability, quality and total cost
- Consolidated fulfilment across several product categories
- Planned bulk and recurring deliveries that support stock continuity
- A clear point of contact for quotations, order coordination and delivery updates

ICT Solutions

Technology services that simplify operations, protect information and provide a scalable foundation for business continuity and growth.

We assess the existing environment, identify priority risks and align the solution roadmap to the client's actual business objectives. Our approach balances technical performance with security, adoption, maintainability and total lifecycle value.

ICT service categories

Infrastructure and networking Design, installation and support for LAN, WAN, wireless networks, endpoints, backup environments and related infrastructure.	**Managed IT support** Structured help desk support, preventive maintenance, incident response, vendor coordination and service reporting.
Cybersecurity Risk-led security reviews, control improvement, monitoring, patching and user-awareness support aligned to the client's exposure.	**Cloud and business continuity** Cloud migration support, backup planning and resilient environments designed to improve availability and recovery readiness.
Custom software and web platforms Purpose-built digital solutions aligned to workflows, customers, reporting requirements and process automation.	**Hardware procurement and deployment** Sourcing, configuration and rollout of suitable computing, networking and related technology equipment.

Client outcomes

- More reliable and scalable technology infrastructure
- Reduced operational risk through proactive maintenance and security controls
- Clearer support ownership and faster issue resolution
- Digital platforms designed around real processes and user needs

Professional Cleaning

Site-specific environmental hygiene programmes that protect health, productivity, reputation and valuable assets.

We develop cleaning plans around site traffic, surface types, operating hours, sensitive areas and service expectations. Delivery is supported by trained supervision, appropriate protective equipment, clear checklists and documented quality reviews.

Cleaning services

Corporate office custodial services

Scheduled cleaning and sanitization of offices, meeting rooms, shared spaces and high-touch surfaces.

Deep and industrial sanitization

Intensive cleaning for periodic, corrective or specialized hygiene requirements.

Carpet and upholstery care

Specialist cleaning that refreshes fabric surfaces and supports their useful life.

Floor care and restoration

Scrubbing, polishing and restoration matched to the floor type, finish and site condition.

Window and glass cleaning

Planned cleaning for internal and safely accessible external glass surfaces.

Washroom hygiene management

Routine cleaning, sanitization, consumable monitoring and hygiene-focused maintenance.

Post-construction cleaning

Detailed removal of dust, residue and finishing debris before handover or occupancy.

Waste handling support

Structured collection and responsible handling within the agreed service scope and site procedures.

Healthcare and sensitive-area cleaning

Tailored programmes that recognise site protocols, operating schedules and higher-control environments.

Quality and safety controls

- Responsible, eco-conscious products selected for people, surfaces and environmental impact
- Screened and uniformed teams trained in safe chemical handling, equipment use and site conduct
- Defined scopes, frequencies, checklists, escalation paths and service reviews
- Supervision and documented quality checks for consistent outcomes

A practical approach built around accountability

Clients need more than a supplier or contractor. They need a partner that understands the operating context, communicates clearly and takes ownership of delivery.

Integrated capability

Supply, technology and hygiene services can be coordinated through one accountable relationship.

Local market understanding

Our Uganda-based team understands local sourcing, operating environments and service expectations.

Quality assurance

Requirements are clarified, standards are defined and delivery is checked against the agreed scope.

Customer-centred service

Solutions are tailored to the client's priorities, timetable, risks and budget rather than forced into a standard package.

Practical innovation

We apply technology, better processes and fit-for-purpose methods where they improve outcomes.

Responsive support

Clients receive clear communication, escalation support and ongoing engagement through completion.

Our delivery process

1	**Discover**	Clarify objectives, site conditions, specifications, risks and priorities.
2	**Design**	Prepare a practical scope, delivery plan, service levels and commercial proposal.
3	**Mobilise**	Confirm resources, suppliers, equipment, personnel and implementation timing.
4	**Deliver**	Execute the agreed service with active coordination and quality control.
5	**Review**	Report progress, resolve exceptions, gather feedback and improve the service.

Trusted relationships supported by clear leadership

Our portfolio reflects experience serving healthcare, engineering, public-sector and civil-society organisations.

Let us discuss what your organisation needs

Share your priorities and our team will respond with a practical next step, a clear scope and a tailored quotation.

A simple way to begin

- Tell us which service area you need: General Supplies, ICT Solutions or Professional Cleaning.
- Describe the requirement, location, expected timeline and any relevant specifications.
- We will review the need, clarify key details and propose the most appropriate next step.
- Following agreement, we will confirm the scope, responsibilities, delivery schedule and reporting arrangements.
